The following is an examiner's statement of reasons for allowance:

Examiner concurs with Applicant's assessment of the deficiencies in the Delatorre reference. The Delatorre "zero circuit 52 first reaches zero and only then actuates the first timer 58....In contrast, in the test arrangement of the invention simultaneous or substantially with storing the electric output signal of the pressure sensor the electrical output signal of the sensor and the storage signal are applied to the inputs of the comparison unit and a zero reference signal is produced therewith. This occurs at the beginning of the measuring time interval in the example embodiment. The Delatorre et al. circuitry and operation are different from Applicant's claimed testing arrangement."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
